### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Shelley Beckstrand on 20 July 2007.

The application has been amended as follows:

Claim 1. A computer system for downloading security context elements that govern execution of agents, comprising:

a computer storage device for storing:

a list of identities of users authorized to execute said agents;

downloadable cross certificates for verifying electronic signatures;

signed agents in applications including signatory name and corresponding electronic signature;

a group list store for storing names of authorized users, said group list store storing the union of names of users authorized to execute agents referenced by applications

downloadable from a plurality of servers;

said computer system for executing agent execution code and agent management

services responsive to said cross certificates and said electronic signature for activating said signed agents.

Claim 2. A computer system for downloading security context elements that govern execution of downloadable and distributable agents, comprising:

a computer storage device for storing:

a restricted agent list store for storing names of user identities of users authorized to execute restricted agents;

an unrestricted agent list store for storing names of user identities of users authorized to execute unrestricted agents;

downloadable cross certificates for use in verifying electronic signatures of names in said list stores;

a group list store for storing names of authorized users, said group list store storing the union of names of users authorized to execute agents referenced by applications downloadable from a plurality of servers;

replicable agents in applications containing signatures specifying name of signatory and corresponding electronic signature for comparison with said downloadable cross certificates;

said computer system for executing agent execution code and agent management services for activating agents dependent upon successful comparison of signatures to cross certificates.

Art Unit: 2134

Claim 3. A server computer system for preparing security context elements for distribution to clients, comprising:

a computer storage device for storing:

application code;

agent code referenced by said application code and including signatures specifying name and corresponding electronic signature of signatories authorized to use said agent code;

a group list store for storing names of authorized signatories, said group list store storing the union of names of signatories authorized to execute agents referenced by applications downloadable from a plurality of servers;

said computer system for executing agent execution code and agent management services for activating agents dependent upon successful comparison of signatures to cross certificates; and

said computer data storage device further for storing a downloadable cross certificate store for storing cross certificates for each user or organization listed in said group list store and selected for downloading.

Claim 4. A client computer system for using security context elements distributed from a server with respect to downloadable application code, comprising:

a computer storage device for storing:

a client side rendition of a server application using a signed agent; agent, said signed agent including signatures specifying name and corresponding electronic

signature of signatories authorized to use said agent code;

a group list store for storing names of signatories, said group list store storing the union of names of users authorized to execute agents referenced by applications downloadable from a plurality of servers;

a cross certificate store for storing certificates for signatories in said group list store;

said computer system for executing agent execution code and agent management services for activating said signed agent dependent upon successful comparison of signatures to cross certificates.

Claim 15. A client computer system for using security context elements distributed from a server with respect to downloadable application code, comprising:

a computer storage device for storing:

a client side rendition of a server application using a signed agent; agent, said signed agent including signatures specifying name and corresponding electronic signature of signatories authorized to use said agent code;

a group list store for storing names of signatories;

a cross certificate store for storing certificates for signatories in said group list store;

said computer system for executing agent execution code for activating said signed agent dependent upon successful comparison of signatures to cross certificates;

said agent execution code being responsive to scheduled or on-demand access to said

signed agent for first accessing said server to update said group list store and said cross certificate store; and

said group list store storing the union of names of signatories authorized to execute agents referenced by applications downloadable from a plurality of servers.

The reasons for allowance may be found in the office action mailed 2/2/2005.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
